

Mercury is POISON

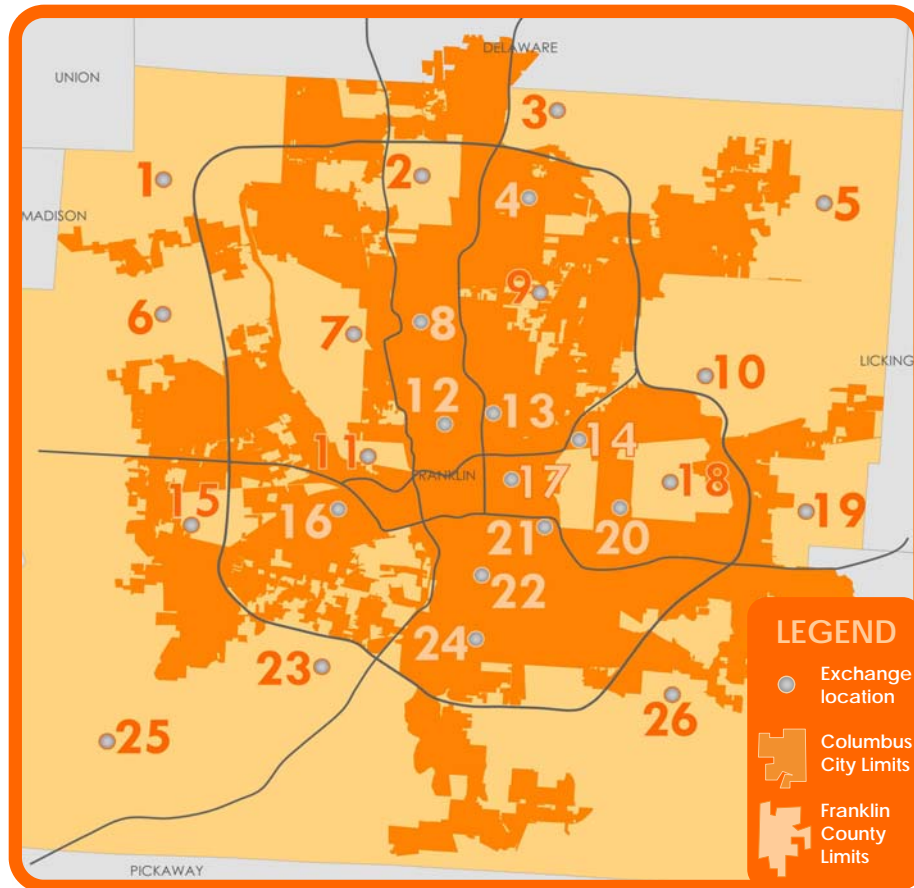

THE HAZARDS OF MERCURY

Thermometers can be a helpful tool in monitoring your health. Your ideal body temperature is 98.6°F. Thermometers that contain mercury are dangerous to your health if mishandled or broken. You should not have a mercury thermometer in your home!

FREE DIGITAL THERMOMETER!

Exchanging your mercury thermometer is easy. Package your thermometer in two sealable plastic bags and/or sealed container. Bring it to one of the fire station exchange locations listed below. You will be able to exchange your old thermometer for a free digital thermometer.
